AGA CAST IRON

Cast iron retains and distributes heat perfectly and who would understand this better than AGA? Cast iron cookware has been part of Britain's history for over three centuries.

The AGA-owned foundry in Shropshire continues this tradition, designing and manufacturing uniquely beautiful cast iron by dedicated craftsmen. AGA cast iron cookware retains heat perfectly, radiating onto the food to lock in flavours and succulence during cooking and is the perfect oven to tableware because it keeps your food warm.

The highly durable, fully enamelled finish on the exterior and acid resistant enamel coating on the interior ensures your AGA cookware remains as stunning as the day it was bought. And with a lifetime guarantee*, you'll enjoy cooking with our cast iron time and time again. What's more, the collection can be used on any heat source including induction.

-  CLARET (CLT)
-  MATT BLACK (MBL)
-  GLOSS BLACK (BLK)
-  VANILLA (VAN)

AGA Cookware is made in the historic Coalbrookdale foundry by dedicated people committed to quality, craftsmanship and attention to detail.

The staff have a real pride in the cookware they produce and it's not uncommon for three generations of a family to work side by side at the Coalbrookdale foundry.

Millions of pounds have been invested in ensuring emissions from the AGA foundry in Coalbrookdale – on the original site where Abraham Darby started the industrial revolution – are as clean as the air you breathe.

*Lifetime limited guarantee: guarantees your cast iron cookware to be free from defects in materials and workmanship under normal household use for the lifetime of the product, in accordance with the care and use instructions provided. Normal wear and tear, misuse of the product, scratches, stains, discolouration or damage caused by the use of cooking sprays and utensils or overheating are not covered.

HANDY HINT:
"The 20cm frying pan is the perfect size for a three-egg omelette. Whisk with seasoning and some chopped herbs. Heat the pan on the boiling plate for a minute, toss in a knob of butter then add the eggs. Move the mixture, working quickly until almost set, then fold into three as you turn onto a hot plate."

— Richard Maggs, AGA Cookery Doctor

HANDY HINT
Baking the perfect AGA loaf need not be daunting. For best results, always ensure you use tepid liquid, not too hot, or it will kill the yeast and the bread won't rise. Allow the dough to rise to double its size - it's ready when you gently prod the dough and it doesn't leave an impression of your fingertip.

*All moulds made from silver anodised aluminium

AGA TOP DOG TEXTILES

NEW Here at AGA Cookshop we have developed a fabulous new range of kitchen textiles called Top Dog, incorporating our own innovative and classic designs that continually offer premium quality and maximum insulation.

Many AGA owners will know their pets find premium position in front of the AGA where they find warmth and the hope of a stray morsel of scrumptious offerings from the cooker. The creation of the print has been inspired by our customers and their lovely dogs resulting in a beautiful, stylish and innovative print to use across our textile range.

CAST IRON OVENS

Food spills are automatically carbonised by the heat of the oven and quickly disappear. Ovens merely need to be brushed out occasionally with the wire brush.

ENAMEL SURFACES

Apply AGA Enamel Cleaner with a damp cloth and immediately wipe with a clean damp cloth.

INSULATED LIDS

The boiling plate lid is, to a large extent, self-cleaning due to the high temperature of the hotplate below.

Leave the lids up for a while to cool. Use AGA Chrome and Steel Cleaner or a damp soap-filled wire pad to clean the inside of the simmering plate lid. Wipe clean with a damp cloth and dry.

HOTPLATES

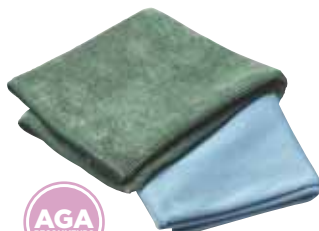

Keep hotplates clean by brushing with the wire brush. Clean hotplates are essential to ensure efficient heat transfer to saucepans and kettles.
